Chapter 11 Authors' contacts and tool-kit feedback

As mentioned in the Introduction, this document is inspired by the wonderful potential offered by the hedges and small woodlands that help shape our landscape. It has been developed as a useful guide for community groups, land owners and others keen to realise this potential. This is a living document designed to be improved by its users. The authors welcome your feedback.

This toolkit has been inspired by, and developed from, the Dartmoor Circle Woodfuel Toolkit – ‘Woodfuel from Hedgerows: A Tool-kit for Communities’ authored by Andrew Shadrake (andrew@dartmoorcircle.org.uk) supported by the Devon Hedge Group and the Tamar Valley AONB. We would particularly like to thank Andrew for his support and access to the material.

The document has also been informed by the workshops and conversations which have taken place as part of the Cordiale Community Supported Woodlands project in the Tamar Valley AONB, the TCV ‘Woodlands: a practical handbook’, and the work of the Community Land Advisory Service amongst others.

Kate Royston (kate.royston@robbeesmole.com) and Dave Readman (dreadman@tamarvalley.org.uk) look forward to receiving your feedback on this tool-kit: what’s worked for you, what could be improved, added, omitted ... and any stories you might have related to its use.
